

FOOD SCIENTIST JOB DESCRIPTION

Los Angeles, 12/30/21

About Us

The food business is evolving and moving faster than ever. Consumers are demanding more plant-based food options and rightfully so. They want to eat healthy and commit to sustainable food ingredients to preserve our planet for generations to come.

Green Boy (www.greenboy.com) helps food manufacturers fulfill this increasing demand by supplying the highest quality non-gmo, plant-based and organic food ingredients on a global scale.

Now entering an exciting phase of growth, we are looking for an ambitious and dedicated Food Scientist to join our growing team.

About the Role

We have a permanent opportunity for a Food Scientist to join the Green Boy team based in Los Angeles.

This is a rare opportunity to join a collaborative team, leading R&D science support work and supporting cross-functional projects from an R&D perspective. Green Boy currently specializes in functional plant-based proteins so a strong understanding and interest in this field will be highly valued.

You will be taking part in exciting projects/studies that can vary from research, analysis, technical support, to customer interaction and driving collaboration with customer R&D teams. This role may also lead to cross-functional projects in collaboration with groups including universities and ingredient producers internationally.

Responsibilities

- Leading the scientific and technical support activities necessary to prove product performance. Including associated administration, risk assessment and documentation requirements
- Working collaboratively with Sales, Production, Logistics and Quality functions to deliver project outcomes
- Assisting in completion of specifications and associated documents and contributing to product/process assessment against applicable regulations
- Provide technical guidance to internal and external parties throughout the initial discussions and later NPD process
- Review of existing product portfolios – identifying formulation and process improvement opportunities.
- Manage and execute tasks in product development projects such as formulations development and product samples.
- Liaising with key stakeholders across the business to facilitate the implementation of new products and processes
- Ensure all practices comply with relevant safety standards
- Assess and document ingredient functionality
- Collate data from past and present ingredient testing to develop an application database
- Complete research tasks independently and in collaboration with external groups

About You

- Bachelor of Science (Food Science and Technology) or similar
- Strong technical knowledge of food development with 3 + years' experience
- Experience in R&D/ Food technology or product development preferably within plant-based proteins
- Demonstrated ability to work across multiple challenging projects as a cross-functional team member or Project Leader
- Strong knowledge of food formulation and processing, and application of experimental design and data analysis
- Working knowledge of food safety standards (BRC, HACCP, etc.)

- Excellent verbal and written communication skills with the ability to liaise with internal and external stakeholders
- A commitment to provide the highest quality product to strict customer specifications
- Highly developed problem solving and analytical skills, initiative, and resourcefulness

Why Green Boy?

- Be part of a supportive and talented team
- Opportunities for career development
- Be part of an excellent culture that holds true to company values
- Support for continual growth
- Complete health insurance, 401k contributions, competitive package

Applications
